

PRESTRESSED CONCRETE TANKS

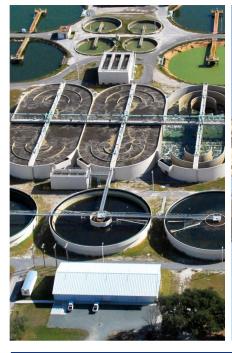

COATINGS and RESTORATIONS

INTRODUCTION TO CROM

CROM® is a specialist in the design and construction of prestressed concrete tanks and infrastructure restoration and repair. With over 65 years of experience, our continued success is driven by our self-performing skilled team with zero division of responsibility for our clients. CROM is built from a foundation of core values that is committed to safety, professional integrity, and high quality execution.

HISTORY OF CROM

In the early 1950's, J.M. Crom, Sr. and three associates, Ted Crom, Jack Crom, Jr., and Frank Bertie, established The Crom Corporation, with headquarters in Gainesville, Florida, for the prime purpose of perfecting the design and construction techniques of tanks utilizing composite walls. Since then, their successors have continued the tradition of excellence initiated by the company's founders.

PRESTRESSED CONCRETE TANKS

CROM has designed and built over 4200 concrete tanks since 1953, with capacities ranging from 50,000 to over 30,000,000 gallons. The success of CROM has been based on our understanding of all phases of design, construction, and management required to produce a tank that is leak-free with life expectancies in excess of 50 years. CROM tanks are designed to AWWA D110 and ACI 372 standards. As a founding member of both design committees, CROM remains a "leader in the industry".

COATINGS AND RESTORATIONS

INFRASTRUCTURE REPAIR SPECIALISTS

CROM Coatings and Restorations brings the experience, quality, and reliability of CROM's 65+ years of design and construction excellence to the restoration of aging infrastructure. CCR specializes in wet/dry inspections, high performance coatings, shotcrete/concrete structural repairs, epoxy and polyurethane crack and leak injection, and carbon-fiber reinforcing.

CCR FEATURE PROJECT: STRUCTURAL CONCRETE REPAIR & WASTEWATER PROTECTIVE COATINGS
